

# Channel - Square - Round Posts

## Square Posts:

The Telespar system consists of square, perforated, welded steel tubing, in three sizes and two gauges.

Perforations or knockouts on all four sides allow you to mount signs back-to-back and on adjacent sides.

The unique manufacturing method used to produce Telespar tubing permits tubular sections of different sizes to telescope into the next larger size making adjustment, reinforcement and splicing fast and easy. The square shape also provides superior wind load capabilities and torsional stability.

## Sizes Include:

Length Width \*Qwik Punch Available in Same Size\*

10'	1 3/4"
10'	2"
12'	1 3/4"
12'	2"
